

## TRAGEDY

Stood at Bedside of Dying  
Gambler in Shape of  
Wife Who Failed Him

### WANTS HIS PARDON

Chicago, Aug. 7.—Tragedy today came to stand at the bedside of "Mike" McDonald, gambler, during his last hour. It was embodied in the form of his wife, Mrs. Dora McDonald, wearily veiled. The doctors at the hospital at St. Anthony de Padua, where the man who made a fortune from the ill-luck of those who tempted fate with the cards, and ivories, has lain stricken for months, said that he could not survive many hours. His third wife, the woman who added the last chapter, embodying a tragic climax to his adventurous life, by shooting and killing Webster Guerin, came to bid him farewell.

Fate was unkind to Mrs. McDonald. She came at the close of one of the spells of consciousness that have been infrequent and brief during the last two days, and she was forced to wait for another brief interval in the corridor outside his room, weeping and walking the floor. With her were her attorney, Colin C. H. Fyffe, and a trained nurse from the South Side sanatorium of which she is an inmate while under bonds of \$50,000 awaiting strength to be able to stand trial for the murder of Guerin.

After she had waited nearly two hours, McDonald still was in a state of coma. Mrs. McDonald went in to see him and left the hospital without having talked to him or without having been recognized.

Mrs. McDonald has been known to crave her husband's forgiveness ever since the murder, and especially in the light of the stories published concerning the causes that led up to the deed. "Mike" McDonald's determination to stand by her until the end of her ordeal was well known, too, and yet he has been said to evade her as much as possible since her preliminary hearing and admission to bail.

Mingled with her grief for her dying husband was the fear expressed by her over and over again as she paced the floor of the corridor, without his door, that he would die without regaining consciousness to recognize her. Attendants wondered what would occur if he should wake up and she would go to him.

The patient has been low ever since his admission to the hospital, with heart trouble and uraemic poisoning. Early today he took a decided turn for the worse and the physicians gave him up. He lapsed into unconsciousness from which he roused only at intervals.

## BANKERS SPECIAL

Smashes Into Carriage and Four Are Killed—Driver Confused.

Asbury Park, N. J., Aug. 7.—Run down by the fast Bankers' special from New York, four people were killed and horribly mangled at the Allenhurst crossing of the New York and Long Branch railroad at 6 o'clock tonight. The victims were in a carriage and about to be driven across the tracks, when, deceived by the approach of an excursion train going in an opposite direction, the driver whipped up his horse after the train had passed and plunged directly in front of the Bankers' special which was going at the rate of 50 miles an hour. The names of the dead are:

Lauretta Grace, Jennie McDonald, Hannah Murphy and Thomas Edwards. The three young women were servant girls employed as waitresses at the Norwood hotel in Allenhurst. Edwards was the coachman, who was driving the party from a lodging house nearby where they had been visiting.

### TAMMANY MAN

Charged With Crooked Accounts by Mayor McClellan.

New York, Aug. 7.—Commissioner of Accounts John C. Hertle was suspended from office today by Acting Mayor McGowan, who acted upon telegraphic instructions from Mayor McClellan. It has been reported in political circles for several days that the district attorney was probing into affairs in Mr. Hertle's office and the announcement of his suspension was not a great surprise. John C. Hertle has been quite prominent in Tammany circles for many years. He was a close personal friend of former Mayor Van Wyck, who appointed him to office. About a year ago Mr. Hertle's wife divorced him. Then she married former Mayor Van Wyck. The Van Wycks have lived abroad most of the time since.

### EX-SECRETARY LONG

Has Suffered Relapse But Condition Is Not Thought Immediately Dangerous.

Portland, Me., Aug. 7.—Ex-Secretary of the Navy John D. Long, who was taken suddenly ill Monday afternoon while enroute by automobile from Boston to Buckfield, Maine, his native place, had a slight relapse tonight. Announcement was made that although Mr. Long's condition was not immediately dangerous, his condition was not as favorable as the afternoon development had promised.

### HAS GAVEL WITH ODD HISTORY.

Maillet Is Made From Wood Collected From Various States.

Portland, Ore.—The gavel George H. Himes, secretary of the Oregon Historical society, presented to Milwaukee grange, Patrons of Husbandry, has a history that might be extended to a large volume made up of interesting things about the northwest. In presenting the gavel Mr. Himes gave a history of the nine different woods of which it is made. The handle is made of the following woods: Seedling apple, from tree planted in 1823 on the McLaughlin place by James Bruce, first on the Pacific coast; piece of Oregon yew tree on the site of old Champego, where it was decided on May 2, 1843, that the Oregon country should be recognized as part of the United States; piece of royal Ann cherry from tree grown from seed brought by Henderson Lewelling from Iowa across the plains in 1847 and set out one-half mile from Milwaukee in the fall of 1847, being the first grafted fruit west of the Rocky mountains; piece of service berry wood from the farm of Ewing Young, the first American settler west of the Rocky mountains, in Chenaleum valley, where he went in 1834.

Head of gavel: Piece of red cedar taken from revolutionary battlefield in New Jersey, overlooking New York; white pine taken from the Columbia, first ship to sail around the Horn from Boston, 1787, entered the Columbia river May 11, 1792, with Capt. Gray in charge, who named the river May 19, 1792; piece of Philippine wood, from islands acquired by United States in Spanish-American war; Oregon grape wood; piece of crabapple tree from the farm of M. M. Carver, who settled in Clackamas county, 1843 earliest settler in that county, founder of Burlington, Ia.; Linnton, Ore.; Sacramento, Cal.; Tacoma, Wash.; red wood of California.

### Operators Walk Out.

Los Angeles, Aug. 7.—All operators in the local office of the Western Union Telegraph company walked out this afternoon. Only one man remained in the operating department and so unexpected was this action that the office was crippled for the night. It is understood that the refusal of the local officials to reinstate an operator who had been discharged was the cause of the walkout.

New Philadelphia—Union hospital to be erected midway between this city and Dover. Made possible by liberal donations.

Salem—Capt. M. L. Edwards, veteran citizen, manufacturer and soldier succumbs to heart trouble.

### Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian tube. When this tube is inflamed you have a running sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever. Nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by local treatment. Send for circulars, free.

Murry K. Hill, whose return engagement at the Park is pronounced a great success. His new bunch of fun is making a hit.

## STANDARD OIL

AGENTS IN CINCINNATI BURN MANY PAPERS

Say They were Valueless Refuse and Not of Use to Government as Evidence.

Cincinnati, Aug. 7.—Considerable excitement was caused today by a report that was confirmed in part by the Standard Oil company's agent in this city, that old papers had been burned in the furnace of the company's headquarters in this city before moving its offices to Covington, Ky., across the Ohio river. The report said that tons of documents including bills of lading, freight bills, and others papers, had been destroyed so as to prevent certain alleged evidence falling into the hands of the state or national authorities in case legal action should be taken against the company in this district. What started the rumor was the moving of many wagon loads of books across the river where it was said they were to be burned.

C. H. Hand, for the company, said today the report in part was true, but that only "valueless refuse" had been destroyed. "We have not destroyed any papers that have any value, continued Mr. Hand, and the report that we have burned papers which might be used against the company is not true. Yes, we have burned tons of papers in the furnace here, but those papers related to business done years ago. The report that we have sent ledgers to Kentucky to be destroyed is false."

### BELMONT TUNNEL

Under East River Will Be Completed Today and Track Laying Will Start.

New York, Aug. 7.—The South tube of the Belmont tunnel under the East river is due to be completed by noon tomorrow. This morning only four feet of earth and rock separated the two headings, and that could have been removed by nightfall were it not for the extreme caution that marks the work at present. The character of the river bottom is such that there is great danger of a blowout and the engineers are going slow. Only one gang of men are at work, and they are in the section of the tube that runs from Long Island City. The completion of the south tunnel finishes this work of excavating, and all that remains to be done is to put on the finishing touches and lay the tracks.

### 53 JAPANESE

Are Ordered Deported and Others Are Waiting—Cost Uncle Sam \$5500 Already.

Eagle Pass, Tex., Aug. 7.—Another lot of 53 Japanese were shipped out here yesterday under guard, they having been ordered deported to Japan. This bunch of Japanese cost Uncle Sam just \$5500 in railway fare alone. In addition to this, ten or fifteen guards and expenses must be added, also the expense of \$1 per day per head for the Japanese during the time they are kept in detention here. There are still quite a number of the Japanese here in the detention camp, and their number is increasing regularly. Fifteen other Japanese were admitted to the country yesterday on presentation of their railway passage to Vancouver, B. C. The immigration laws and the ruling of the department is to the effect that nothing can be done with the Japanese so admitted if they get off the train anywhere in this country.

Akron—Street car breaks away and rushes down west hill. Only serious result being the killing of a horse.

### BURNING RAFT

Set Adrift by Atlantic City Pier Owners Causes Great Maritime Excitement.

Atlantic City, Aug. 7.—The managers of Young's million dollar pier who sought to get rid of a raft of lumber and rubbish and give the pier patrons a night spectacle, set fire to the big raft after it had been loosed from the end of the pier and started a beach sensation that spread to the city and government life guards and for miles up and down the coast. Rockets and red fire had been placed in the rubbish and their explosion a mile or more at sea sent the news flying along the coast that a big vessel was in distress. Before the real nature of the blaze had been discovered, alarms had been sent out from government lookout stations, and the lighthouse volunteer had been gathered and launched the big life boats from the inlet and half a score of inlet yachts manned to go to the rescue of the supposed imperiled sailors.

As the raft drifted down the shore and the rescuers were seen making their way towards it, the boardwalk thousands spread the alarm to hotels and cafes and practically the entire summer population turned out to watch. The unconscious hoax was not solved until they were within a few hundred yards of the burning raft and two boats which ran out from the lower end of the island ran close to the raft, believing that it still contained shipwrecked sailors. The raft is still drifting down the coast at midnight, and alarming stories of burning ships are pouring in over public and maritime wires from points miles down the shore.

### WILLIAMS CONFIDENT

That Recount Will Only Show That His Majority Is Sure.

Jackson, Miss., Aug. 7.—Senator-elect John Sharp Williams arrived from his home in Yazoo City today and was met at the station by a crowd of enthusiastic friends and escorted to his hotel where he held a levee all day. Mr. Williams declares that he has no fears of the result of the meeting of the state committee tomorrow. He is ready and willing for it, but sees no sense in any recount of the votes as his majority of fifteen hundred cannot possibly be overcome, he says.

Hundreds of Williams and Vardaman supporters are already here, and the hotels have received numerous orders to have rooms held for tomorrow. In the meantime fraud, stuffed ballot boxes, erroneous counts, and Republicans voting, are being charged by both sides and Governor Vardaman's managers still have an eye on the prize, hoping against hope.

### THAW PARTY

Lives in Seclusion at Hotel—Personal of Party Arouses Curiosity.

Mt. Clemens, Mich., Aug. 7.—Mrs. William A. Thaw, mother of Harry K. Thaw, and her party, are almost as much prisoners here as the son in the New York Tombs. They occupy two connecting rooms on the third floor of the Colonial hotel, and remain in seclusion. Nobody about the hotel has seen anything of the party since their arrival except hotel employees. They keep close to their rooms, where their meals are served to them, and have not appeared once among the guests of the hotel. The register shows Mrs. Thaw and maid to be guests of the hotel, while just below is the name of Mrs. Robert Christie, Allegheny, Pa. What the latter woman is in a problem which goes about the hotel are trying to solve.

## Non-alcoholic Sarsaparilla

If you think you need a tonic, ask your doctor. If you think you need something for your blood, ask your doctor. If you think you would like to try Ayer's non-alcoholic Sarsaparilla, ask your doctor. We publish the formulae of all our preparations. Lowell, Mass.

Too Much **MONEY** Is Bad

Not enough is worse, but to be in debt is the worst condition we know of. If you are troubled with any of the above difficulties come to us and we will help you. We loan on household furniture, pianos, horses, wagons, fixtures and other personal property, leaving them in your possession. You have the use of both the money and security.

**CANTON FINANCE CO.**

Dime Savings Bank Bldg., corner Tuscarawas and Walnut Streets. Loans made in all surrounding towns.

### Proposition Sent Finley.

Montgomery, Ala., Aug. 7.—A proposition out of which the controversy between the state and the Southern railway is expected to be settled has been drawn up and sent to President Finley of the Southern in New York for approval. Until he answers there will be no change in the situation. In an interview given out today Governor Comer says that the laws must be obeyed and that every day the law is being violated and the offenders should be arrested and fined.

### German Wreck Kills Nine.

Posen, East Prussia, Aug. 7.—The express from Eydtkuhnen to Berlin was derailed at midnight near Gnesen. The two locomotives that were drawing the train were overturned and several coaches were smashed, including three sleeping cars. Up to 5 p. m. today nine dead bodies had been taken from the wreck. Twelve persons were injured.

### Wants No Japanese.

Washington, Aug. 7.—California welcomes all Caucasians to the state, but does not want Japanese, according to an official communication received at the Division of Immigration, Bureau of Immigration.

### Novel Punishment for Moors.

London, Aug. 7.—The Tangier correspondent of the Times says that several Moors have been arrested for talking sedition against the sultan. Cayenne pepper was rubbed into the lips to teach them to restrain their tongues.

In 27 years Dr. J. Hirschberg, a German oculist, has used the magnet in 347 operations for removing particles from the eye. In the eight years ending 1903 he performed the operation 64 times, securing good and permanent vision in 36 cases. In nine of the 36 cases the bit of iron was removed from the vitreous, in 27 from the retina; 22 were fresh cases and 14 were old. In 22 of the 64 cases the injured eye had to be taken out, the iron pieces being large or blood poisoning following the injury. In four cases the magnet failed to remove the particles.

### Thunder Superstitions.

Thunder, just because it is a noise for which there is no visible cause, has always excited the imagination of the unscientific. One old writer explains the belief of his day that "a storm is said to follow presently when a company of hogges runne crying home," on the ground that "a hogge is most dull and of a melancholy nature and so by reason doth foresee the rain that cometh." Leonard Digges, in his "Prognostication Everlasting" (1556) mentions that "thunder in the morning signifies wind, about noon rain and in the evening a great tempest."

### A Remarkable New Potato

The British Vice Consul at Rouen reports that the cultivation in France of the new potato brought from Uruguay has been observed for some time with great interest. The variety is called "Solignum commercialis violet," is said to possess excellence of taste as well as nutritive value, and is equal to the best table potato known in France. This variety is distinguished by its resistance to frost, as also to disease, and its one great advantage is that it prospers most in a damp and swampy soil, where no other kind of potato would grow.

### Chemistry of Fatigue.

A German investigator, Weichardt, has promulgated the theory that fatigue is the direct result of a poison manufactured by the system and developed by hard work, and requiring rest to drive it out. Weichardt experimented with the muscle juice of guinea pigs which he had previously fatigued, and his examination proved that this juice acted as a veritable poison similar to some of the well-known toxins. By inoculating other animals he produced symptoms of fatigue and large doses produced death.

### Matches Burned in a Day.

It is estimated that the United Kingdom alone manages to consume 500,000,000 matches a day, which comes out at about 12 for every man, woman and child. Smokers probably account for the greater number so that they will be interested to know that about 90 tons of wood are used up in the form of matches every day, or about 20,000 tons a year. If one day's consumption of matches were placed end to end they would extend for a distance of about 15,000 miles. Sweden and Norway, where matches are made in enormous quantities, export over 25,000 tons of wooden matches every year. In France, where the tax on matches averages 8 cents an inhabitant, the consumption is comparatively small.

## PEACE COMMISSION

Still at Work With Multiplicity of Questions—Delegates Are Divided.

The Hague, Aug. 7.—Before the commission dealing with humanitarian usages in warfare Lord Roay today gave Great Britain's adhesion to the declaration of confidence in 1899 against the use of dum-dum bullets. The main purpose of the commission's meeting was to seek to frame regulations for balloons and other aerial adjuncts of warfare.

Russia, Belgium and Italy had proposals which were eventually formulated by Count Tornelli as follows:

Any balloons used for destructive purposes in warfare should be dirigible, and be manned by regular military crews. The vote on the proposal stood 8 to 6 in favor of it. Eleven delegates abstained from voting. France headed the objectors, maintaining that the best course would be to simply apply the rules already existing on bombardment and the use of mines. Germany shared considerably in this view.

A second proposal forbidding the dropping of projectiles on undefended towns and villages or the discharge of deleterious gases thereon, but permitting the dropping of projectiles over regularly beleaguered garrisons was carried by a vote of 30 to 2.

The commission dealing with the capture or destruction of prizes and the private maritime property of an enemy's citizens failed entirely to make any progress.
